UNIVERSAL ROBOTS SUMMER ACADEMY High School Students Operator Training (Certified)

Course Overview:

This course is based on 26-contact hours of curriculum developed by Universal Robots. Through this course you will have hands-on experience with a UR robot. You will have programmed the robot several times to perform common tasks, including the operation of common peripherals (conveyors, sensors, grippers). You will be able to optimize a pick and place program, perform palletization operations, understand safety concepts, and know the additional resources available to you. Completing the course, you will then be ready to create programs in an industrial setting or continue on with your learning journey and create more complex programming applications. You must have completed the UR Academy free e-Learning Core Track before attending this course.

Course Information:

Monday, June 23 - Thursday, June 26, 2025
9:00 a.m. - 4:00 p.m.
Lunch provided daily at 12:30 p.m.

Address:

FWD Center
321 State Street, 6th floor • Rochester, NY 14608

Course fee: \$1,200

COST TO YOU: \$120

*90% of tuition assistance made possible by grant funding.
